

HAL System Architecture

RANE
HALOGEN

Outline

- **Target Applications**
- **HAL System Architecture Review**
 - **Intro to HAL System hardware**
 - 4 HAL models
 - 6 DR: Digital Remotes
 - 22 RADs: Remote Audio Device
 - 5 EXP: Expanders for HAL1x
 - **What's New (shipping in November)**
 - DR6 touch screen control remote
 - EXP2x Dante Expander for HAL1
 - **Halogen software highlights**

HAL Target Applications

- Music & paging systems - retail/restaurant
- Auditorium, church, theater
- Meeting rooms, convention spaces, conference rooms
- Room combining, overflow or prefunction room

Some HAL Installs

- AC Davis High School Gym, Yakima, WA
- Air Guard Facility, Fargo, ND
- Aritzia (retail), NY NY
- Arsenal Technical High School - Career Tech Center, Indianapolis, IN
- Atlantis water park, Herzogenaurach, Germany
- Avera St. Luke's Hospital multifunction space with room combine, Aberdeen, SD
- Barbagallo Raceway, Neerabup, WA, Australia
- Baths Hall (performance theatre), Scunthorpe, UK
- BJ's Brewhouse, somewhere? USA
- Brown Deer Fieldhouse, Brown Deer, WI
- Cafeteria, Southeastern Regional Vocational Technical High School, South Easton, MA
- Canada Bay Club, Five Dock, NSW, Australia
- Carrabbas on Kirby, Houston, TX
- Caterpillar (office), Australia
- CCH multi-room meeting & banquet facility, Kuala Lumpur, Malaysia
- Clwyd Theatr Cymru, Flintshire, UK
- Collège Boréal, Ontario, Canada
- Conference Center Room Combine, Boeing Company, Chantilly, VA
- Craigleath Ski Club (lodge), Collingwood, Ontario, Canada
- Crystal Pool and Fitness Centre, Victoria. BC
- Dali Art Museum, St. Petersburg, FL thedali.org
- Duquesne University, Chapel of the Holy Spirit, Pittsburgh, PA
- El Molino High School, Forestville, CA
- Gaylord Texas Resort, Grapevine, TX
- Hartville Hardware (330,000 sq feet), Hartville, OH
- Hilton Garden Inn, Las Vegas, NV
- HMS Santa Regina cruise ship, New Zealand
- Holiday Inn, North Vancouver, BC, Canada
- Homewood Flossmoor HS, Flossmoor, IL
- Hope Inn Hotel, Hindmarsh, Adelaide, Australia
- Hyatt Regency Grand Cypress, Orlando, FL & Louisville, KY
- Kissimmee Utility Authority boardroom, FL
- Kuakini Hospital, Honolulu, HI
- Main Event Entertainment, Katy, San Antonio & Shenandoah, TX
- Malibu Presbyterian Church, Malibu, CA
- Marriott Courtyards, Indianapolis, IN & Mankato MN
- Medical Office with room combine, Duncan, OK
- Miramar Cultural Center, Miramar FL
- Morinville Cultural Centre, Morinville, Alberta
- Nobu Sushi House, Malibu, CA
- Oak Bay Beach Hotel, Victoria BC, Canada
- Operatorium (remote operating room for education), undisclosed location (military)
- Orchestra Hall, Minneapolis, MN
- PNW Univ 300 student combinable classroom, Yakima, WA
- Perkins Park Club, Stuttgart, Germany
- Port Colborne Centre, Port Colborne, Ontario, Canada
- Public Safety Academy, Enfield, CT
- Radisson Blu Hotel, Bloomington, MN
- Ramada Leipzig, Germany

HAL System Architecture

Audio Solution: HAL System

Software:

Halogen Windows on PC, Linux on HAL devices

Brains:

HALs

Control:

DRs
Knobs & Buttons

TCP/IP Control

Web Controls

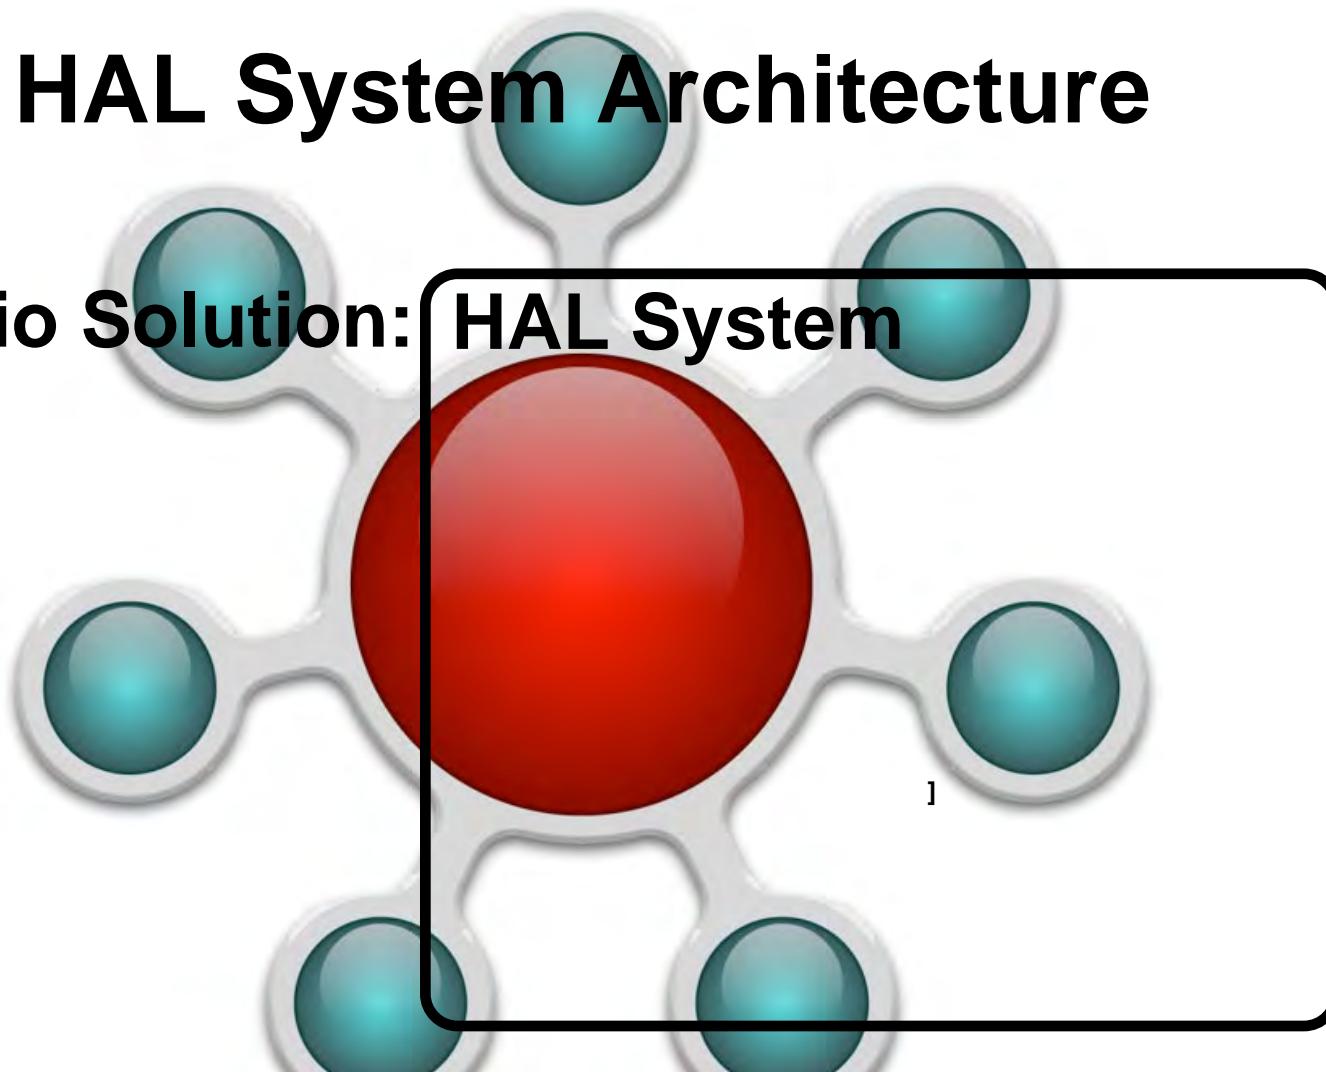

Audio Expansion:

RADs
2x2 A/D+D/A

EXPs
Proprietary & Standard
Audio-over-Ethernet

HAL System Architecture

Audio Solution: **HAL System**

HAL System

HAL System Architecture

Audio Solution: **HAL System**

Software: **Halogen** Windows on PC, Linux on HAL devices

Halogen Software

In Windows

Solution for:

- Preliminary & final design
 - Generate system requirements & labels
- Fast & accurate equipment selection & bid assistance
- Configure final system
 - I/O, processing & control
- COMPLETELY configure, tweak & test behavior & control
- KNOW IT WORKS AS DESIGNED BEFORE SELECTING, BIDDING

Setup / Control a Live HAL System

Solution for:

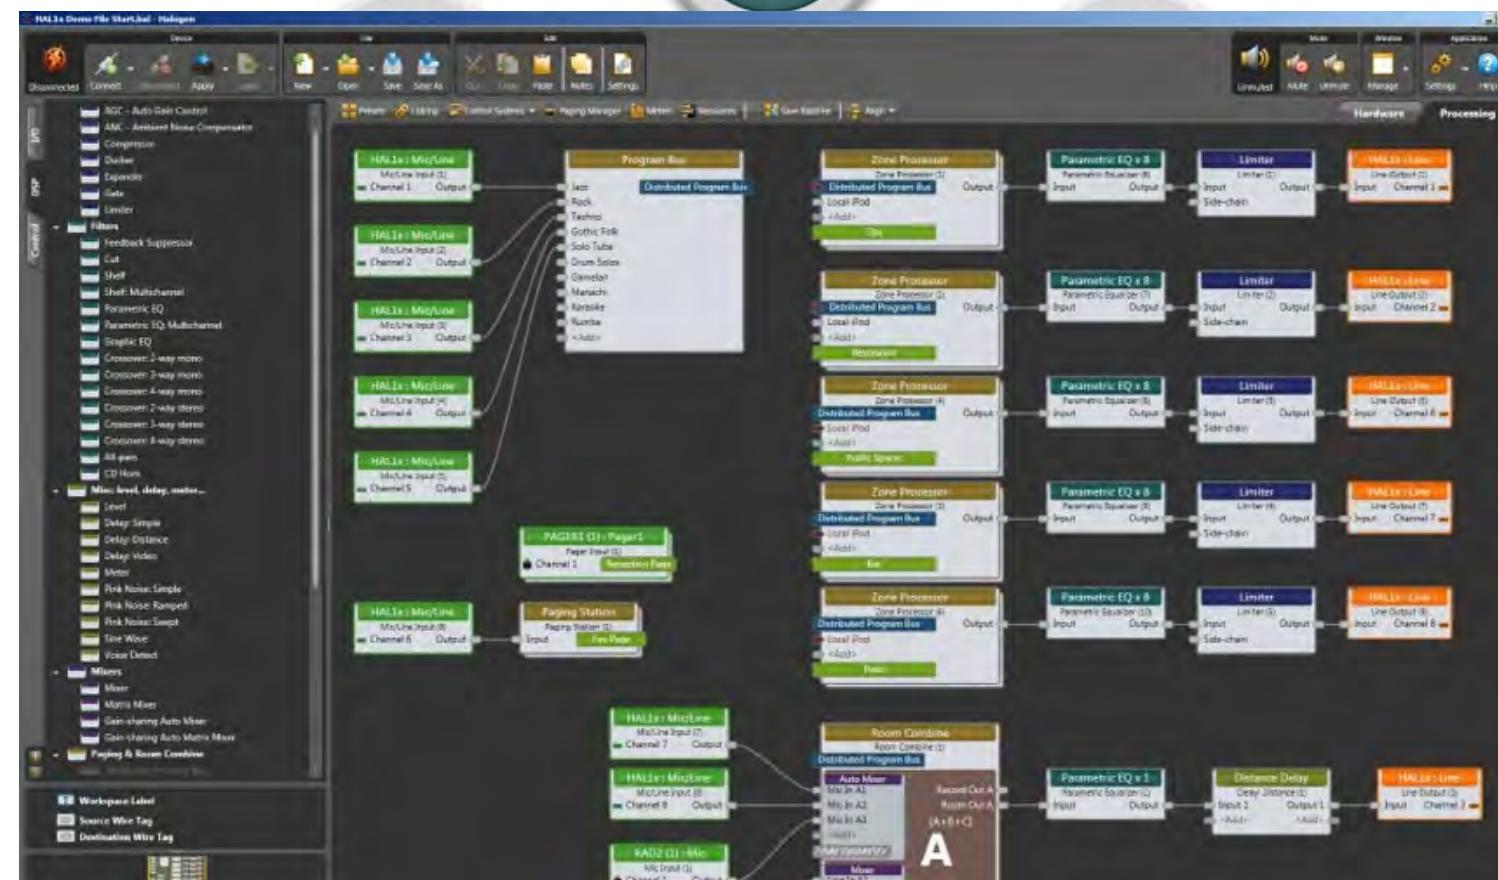

- Automatic verification of signal & infrastructure
- Troubleshooting indication in hardware & software
- Finalize I/O, processing & controlFinalize on site configuration, tweak & verify control
- Same Software on PC & HAL: HARDWARE BEHAVIORS ALWAYS MATCH SOFTWARE BEHAVIORS

Linux in Live HAL

Solution for:

- 24/7 control & monitoring
 - HAL Web Server
 - TCP/IP 3rd-Party
- Internet monitorIndicators on ALL HAL System devices for confidence & troubleshootingUse DRs, RADs in portable carts & padded racks
 - Swap any DR, RAD or EXP anywhere, any vintage

DR

DRs - Digital Remotes

Control any HAL using knobs & buttons

Key features:

- Auto firmware & settings sent from any HAL
- Hot swap, hot crimp, portability
- Customizable, location-aware LCD labeling
- Shielded CAT 5e or better homeruns
 - Automatic physical addressing
- 300 m (1,000 feet) maximum from HAL
- Device location & RJ-45 crimps are tested:
Troubleshooting indication in SW & HW (both)

Audio
Expansion

RADs

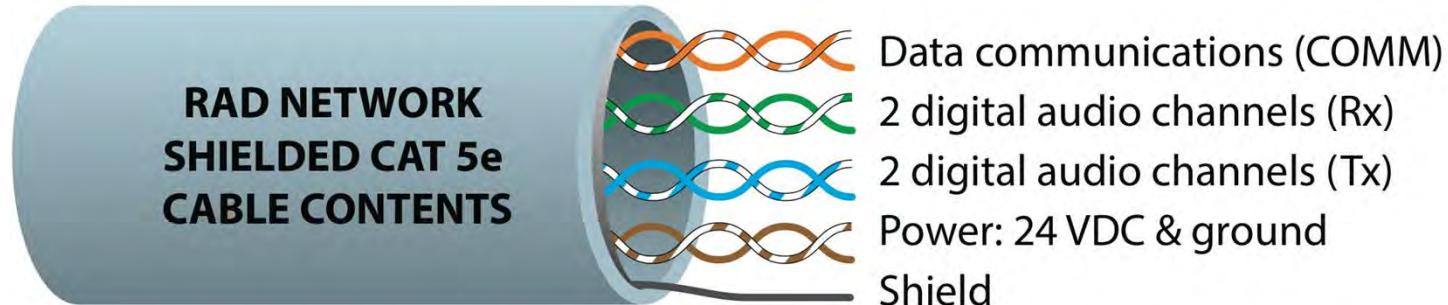

RADs - Remote Audio Devices

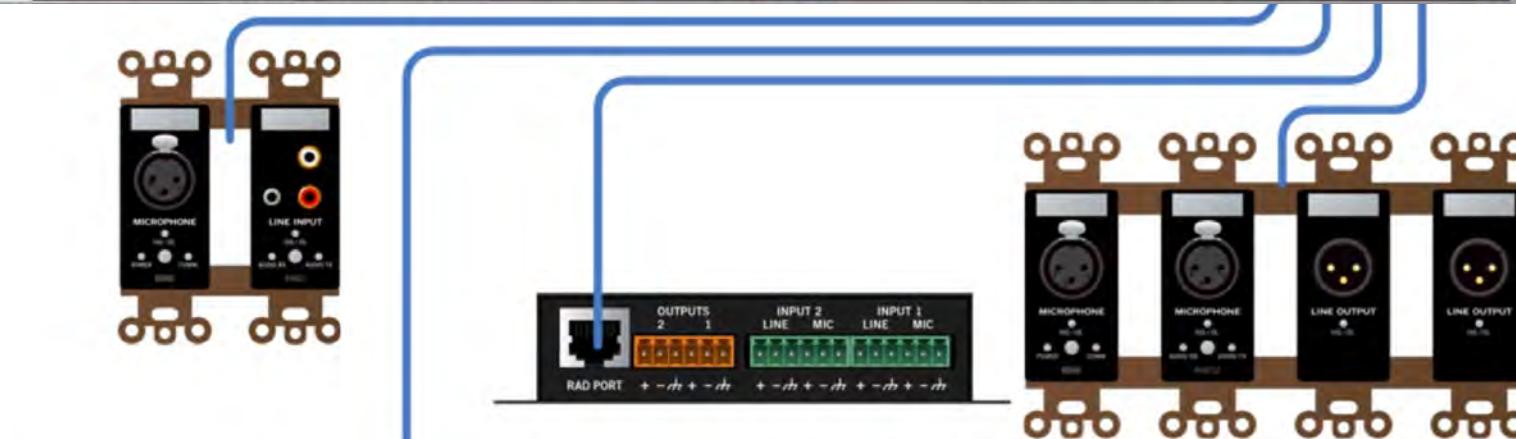

Incremental (2x2) expand audio for any HAL
A/D & D/A at the wall, podium, desk...

- Auto firmware & settings sent from any HAL
- Hot swap, hot crimp, portability
- Location-aware
- Shielded CAT 5e or better homeruns
 - Automatic physical addressing
- 150 m (500 feet) maximum from HAL
- Audio, device location & crimps testing
 - Troubleshooting indication in SW & HW (both)

What's in the RAD cable?

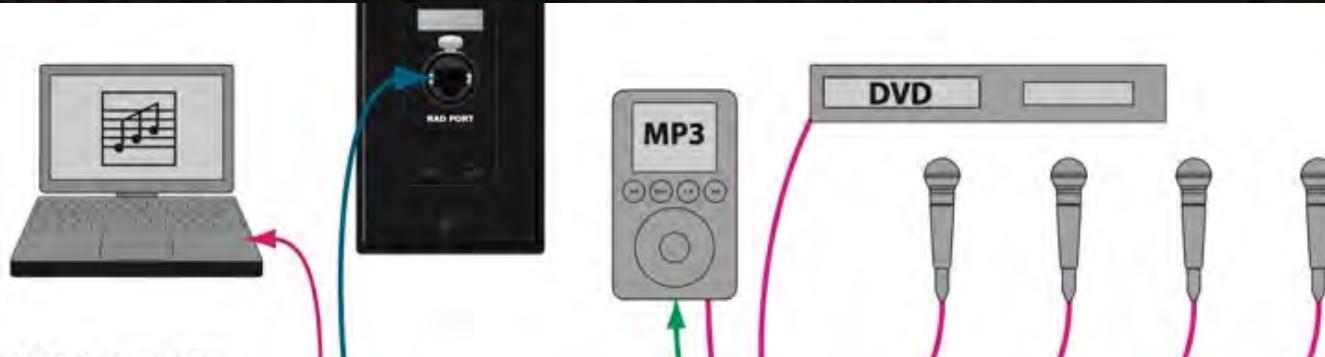

- **Communications RS-485**
- **AES3 Receive, 24-bit, 48 kHz; 2 audio Channels**
- **AES3 Transmit 24-bit, 48 kHz; 2 audio Channels**
- **Power & ground**
- **Shielded CAT 5e (or better) cable required**

4 RAD Ports: from 2x2 I/O to 64 inputs. Audio where it's needed.
Homerun connection: auto-checks CAT5 crimp & verifies audio.

20 models: RADs, PAGER1, AM1 & AM2 Automixers, & 3 DRs

AM1 & AM2 Gain-Sharing Automixer (also RADs)

AM1 Automixer

AM2 Automixer

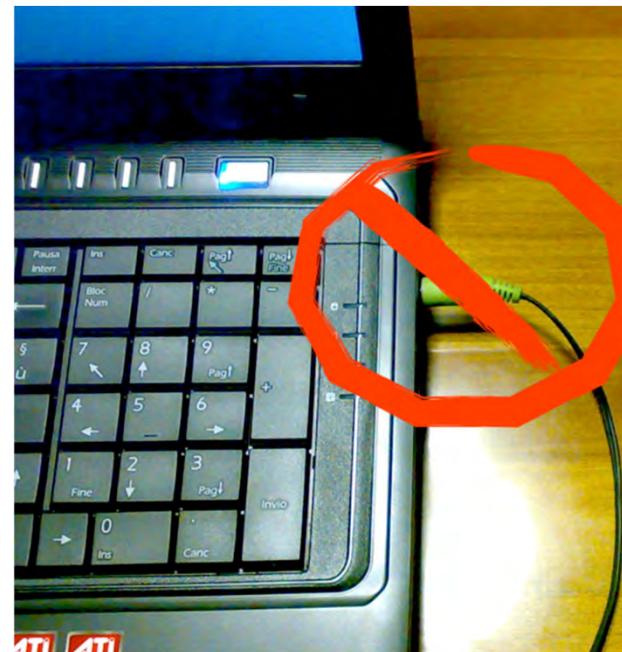

A close-up photograph of the RAD27 USB Audio Sound Card. The device is a rectangular metal panel with a black plastic faceplate. At the top left, it says "Sound Card I/O". In the center, there is a USB port with the text "INPUT" above it and "OUTPUT" below it, with "PLAY" and "RECORD" options. A black 3.5mm audio jack is inserted into the USB port. On the left side, there are two green indicator lights: "AUDIO RX" (top) and "POWER" (bottom). On the right side, there are two green indicator lights: "AUDIO TX" (top) and "COMM" (bottom). The word "RAD27" is printed at the bottom right.

RAD27 USB Audio Sound Card

- **USB Audio I/O**
- **16-bit, 48 kHz**
- **Simultaneously Playback & Record from one PC**
- **Any vintage Mac or PC**
 - No driver to install
- **Auto-senses OS authorization:**
 - Projector on, screen/lights down, switch vid

RAD27 USB Audio Sound Card

- Presentation Podiums
- Meeting Rooms, Education
- City Council, PTA meetings, School Dances, Nightclubs, Concerts, Sports events...
- PCs with prerecorded announcements,

PAGER1 Desktop Paging Station

- Mic stage RAD
 - SW adjust
- **Scenario (group of zones) LCD list**
- **Select knob, push-to-talk**
- **Status indicators**
- **32 supported**

RAD17

- **Boundary Layer Mic RAD**
 - aka PZM Pressure Zone Mic
- **Weather resistant ...mylar**
 - Omni electret element
- **Ambient noise sensing,
surveillance, interrogation,
detention center, security,
industrial, train stations...**
- **Use with *Ambient Noise
Compensation* DSP block**
- **Spray paint any color to please
Interior decorators**

RAD24 amp

- One watt into 8 ohms, one channel
- For office, bath
- Plenum rated UL 2043

HAL System Architecture

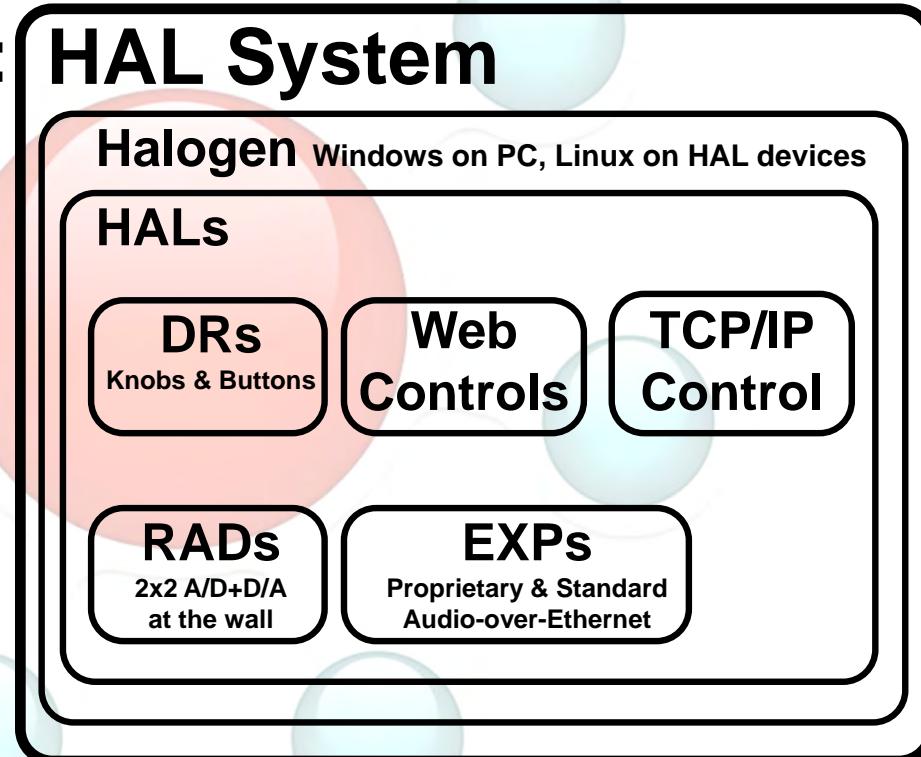

Audio Solution: HAL System

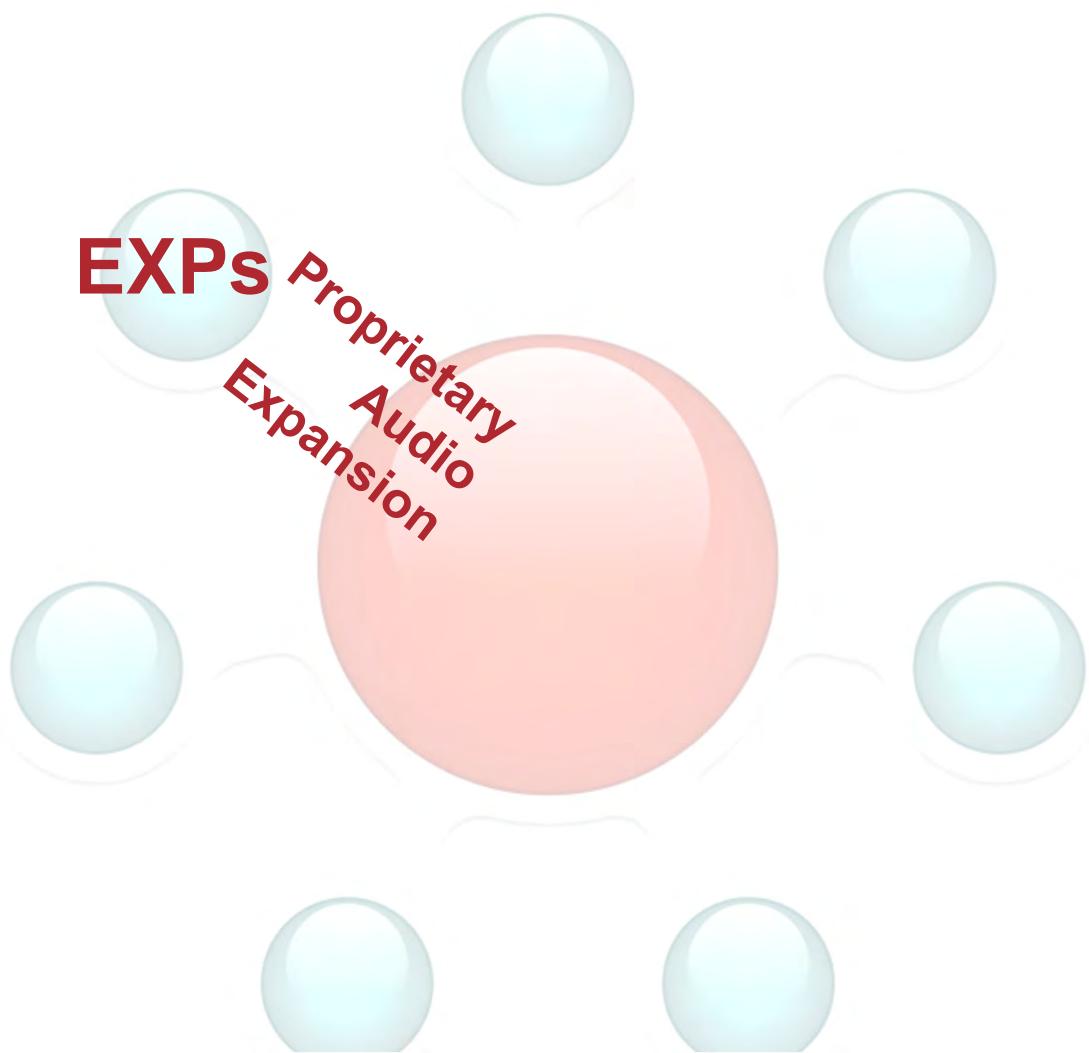

Software: Halogen Windows on PC, Linux on HAL devices

Control:

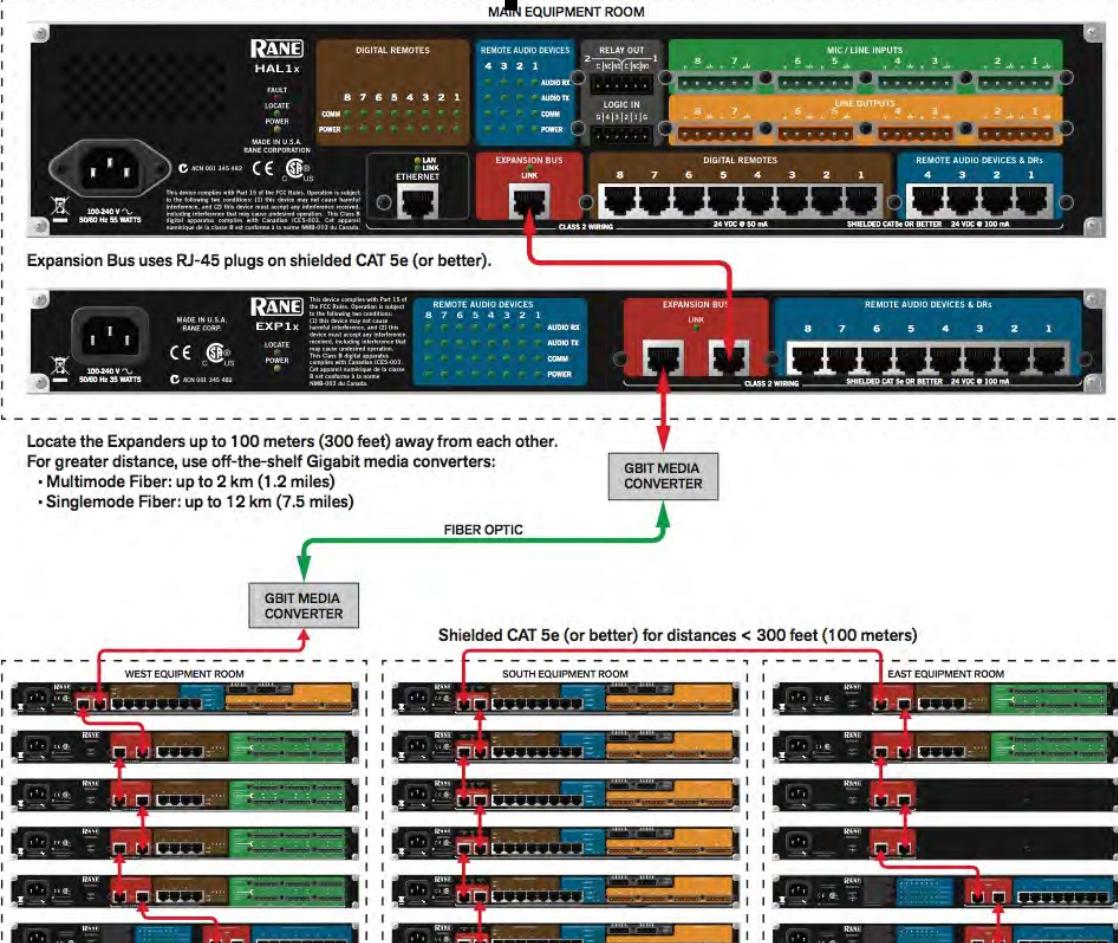

Audio Expansion:

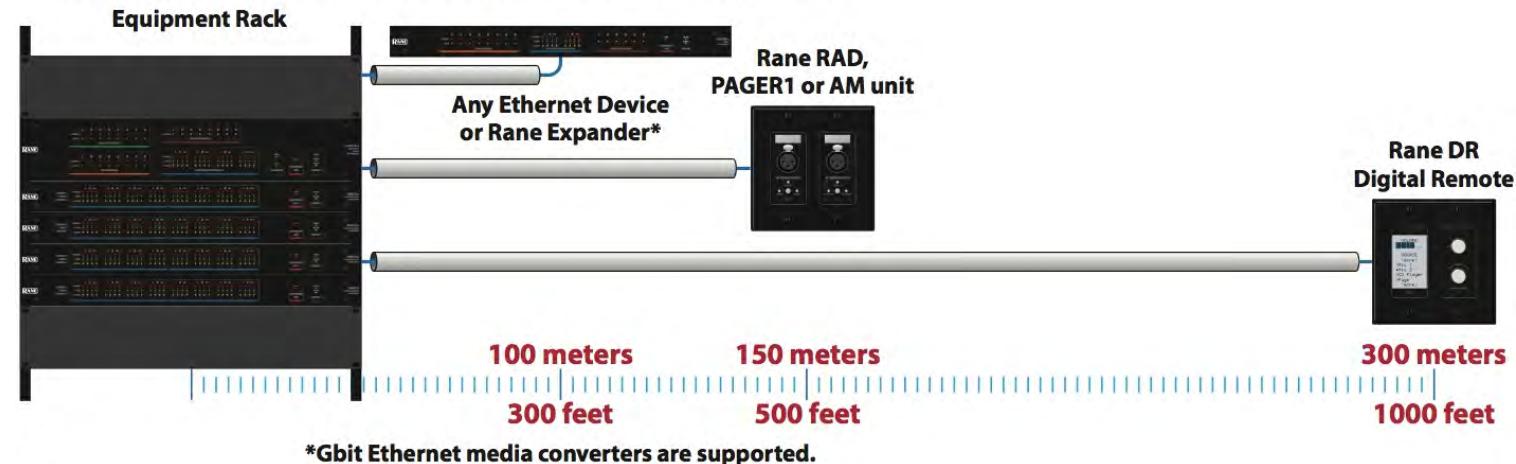

“EXP” Expansion Bus

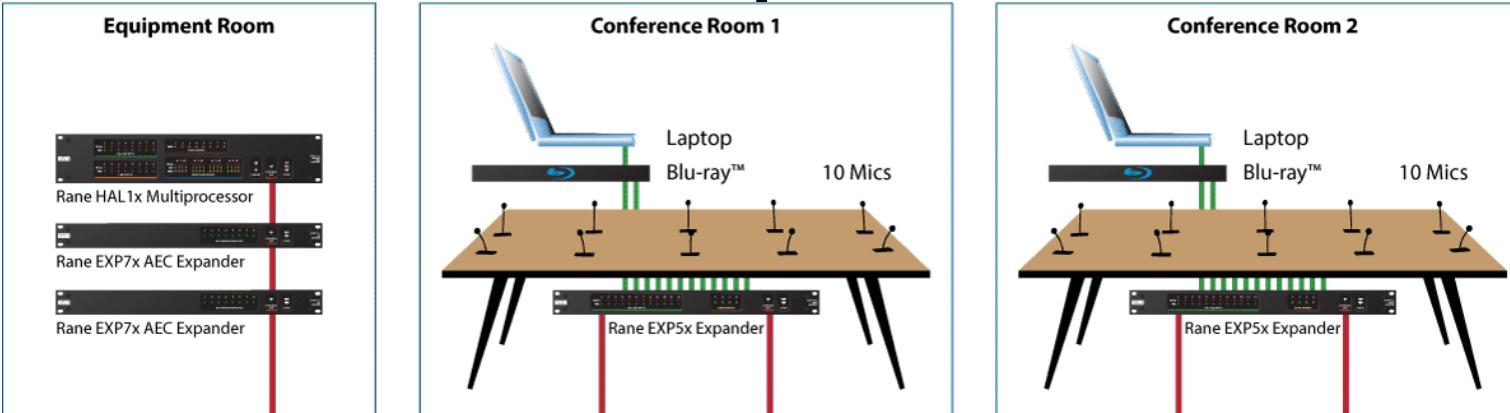

- **EXP1x, EXP2x, EXP3x, EXP5x & EXP7x**

- Conference Centers, Classrooms, Campus Halls, Malls, Arenas, Sports & Water Parks, Multiple Equipment Rooms

Ethernet, RAD and DR Cable Lengths

Useful HAL1x Expansion Bus Idea

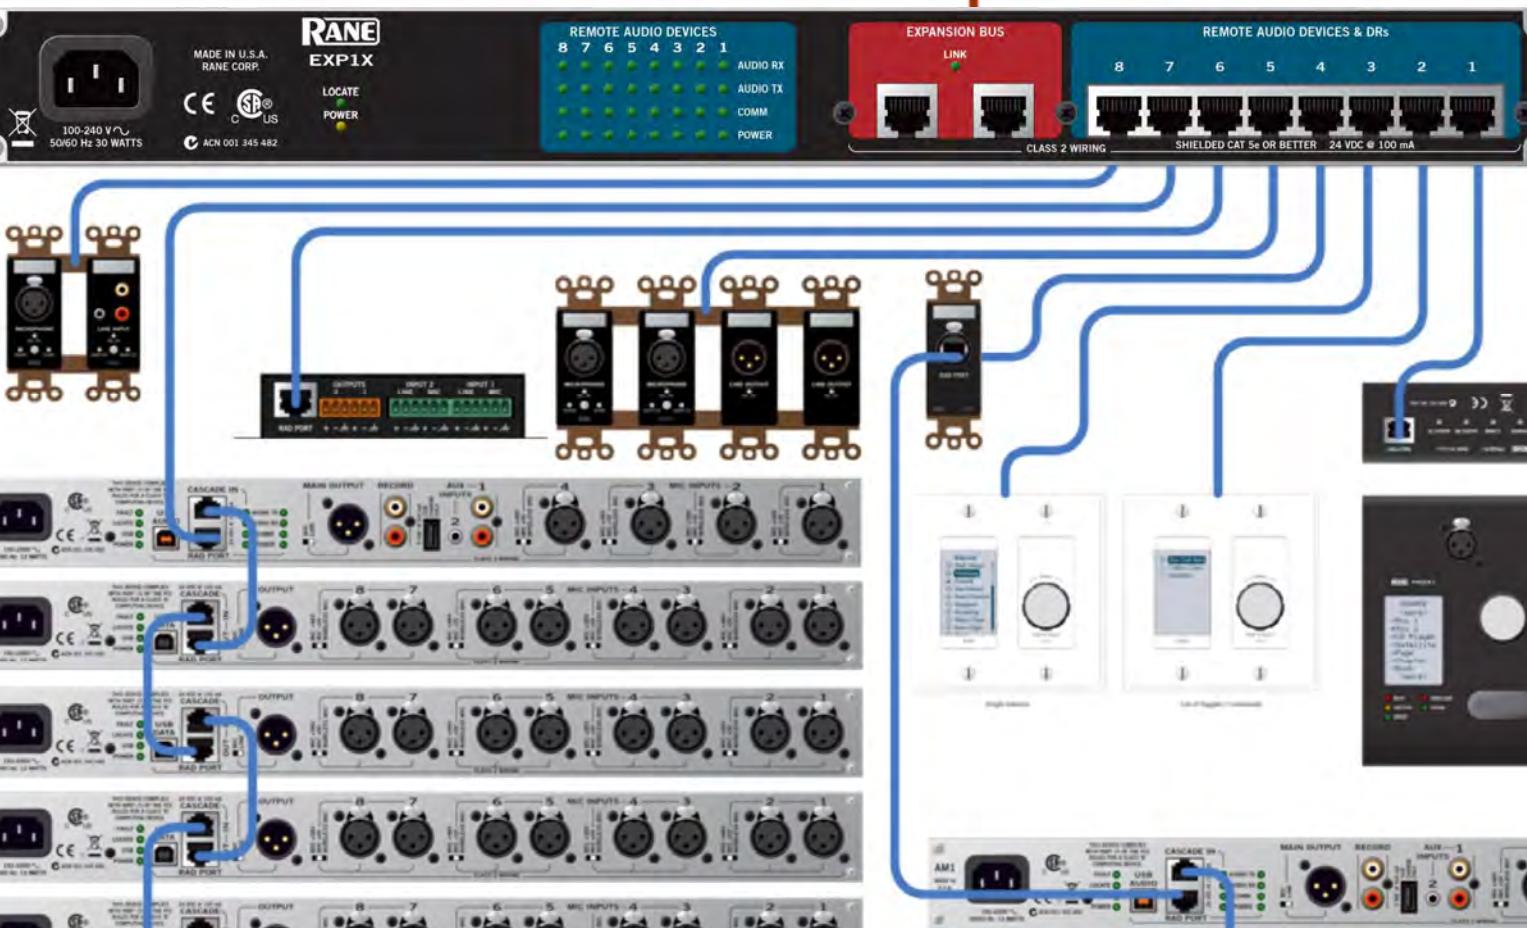

EXPs - Expanding HAL1x in racks and rooms

512x512 audio Expansion Bus for HAL1x

- Auto firmware & settings sent from HAL1x
- Hot swap, hot crimp, auto SW wiring
- Daisychain any combo up to 32 EXPs
- Shielded CAT 5e or better or unmanaged fiber optic gigabit media converters
- Ethernet layer 1 (*not* layer 2)
- 100 m (325 feet) between devices
- Link indication in SW & HW: both cable ends

EXP1x - Expand more RAD/DRs

EXP3x Output & DSP Expander

- **4 inputs 12 outputs**
- **8 Logic Outputs - for 70 V relay paging apps**
- **Daisychain $32 = 256$ out; +64 RADs = 384 outputs**

Fixed Output DSP included:

EXP5x Input & DSP Expander

- 12 Mic/Line/Line-Plus - handles any audio input
 - Line-Plus: Monos unbalanced RCA L&R inputs

EXP5x (1) : Mic/Line-Plus

Mic/Line-Plus Input (1)

Channel 1 Output

Fixed Input DSP included:

Mic/Line-Plus Input (1)

HALL - EXP Position 2 - EXP5x - Analog Input Port 1 - Mic/Line-Plus

?

EXP5x (1) : Mic/Line-Plus

EXP5x Input (1)

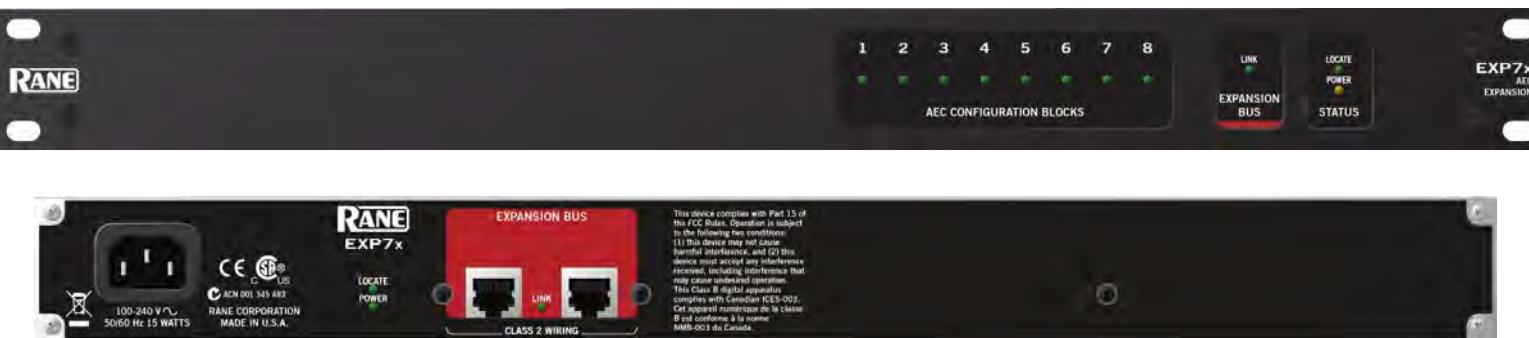

Compressor

EXP5x Compressor (1)

5-band PEQ

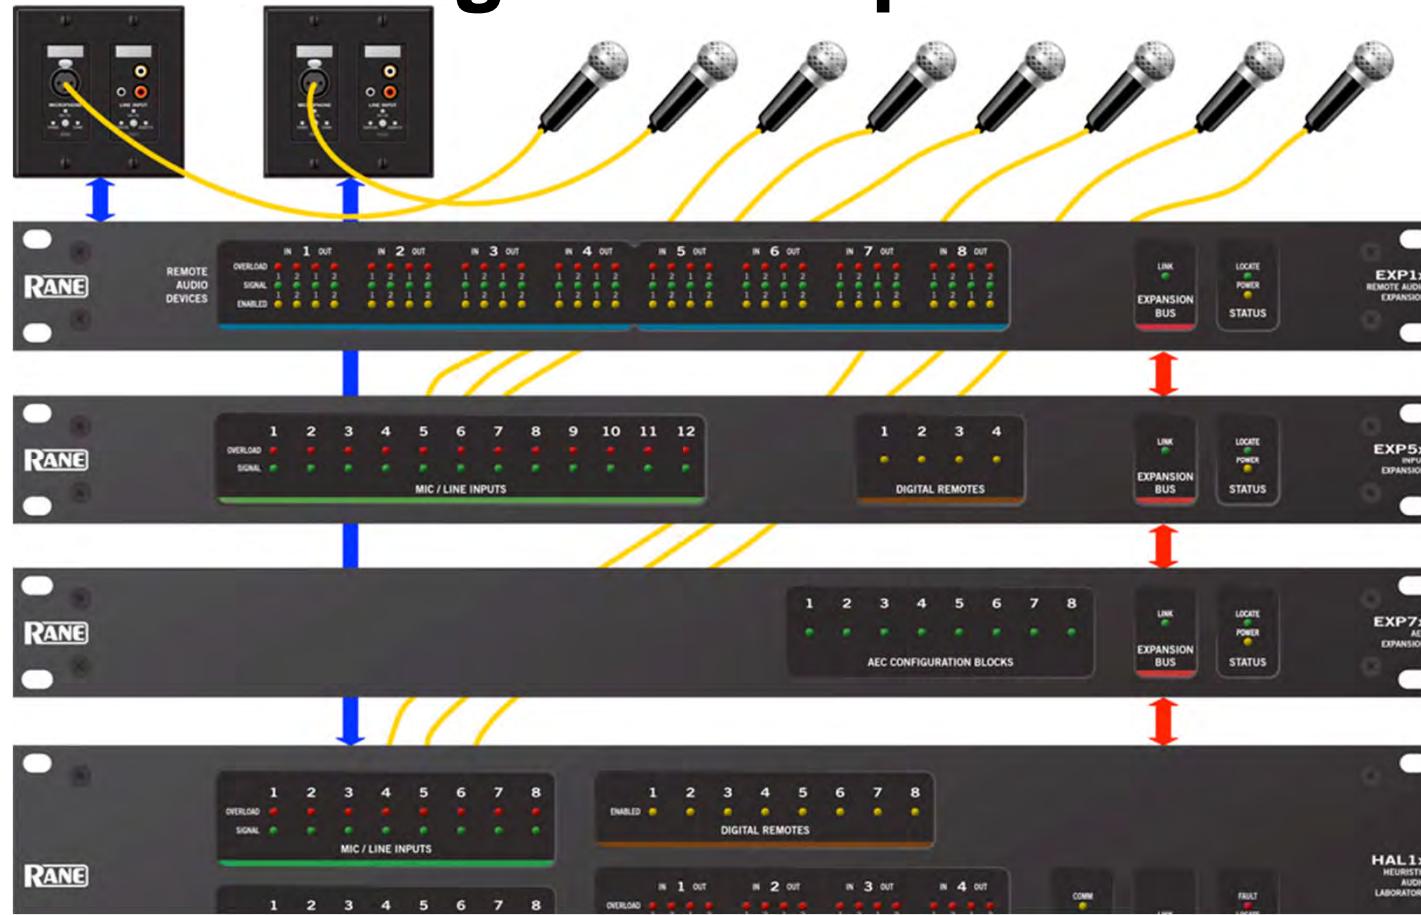

EXP5x PEQ (1)

EXP7x: Acoustic Echo Cancelling

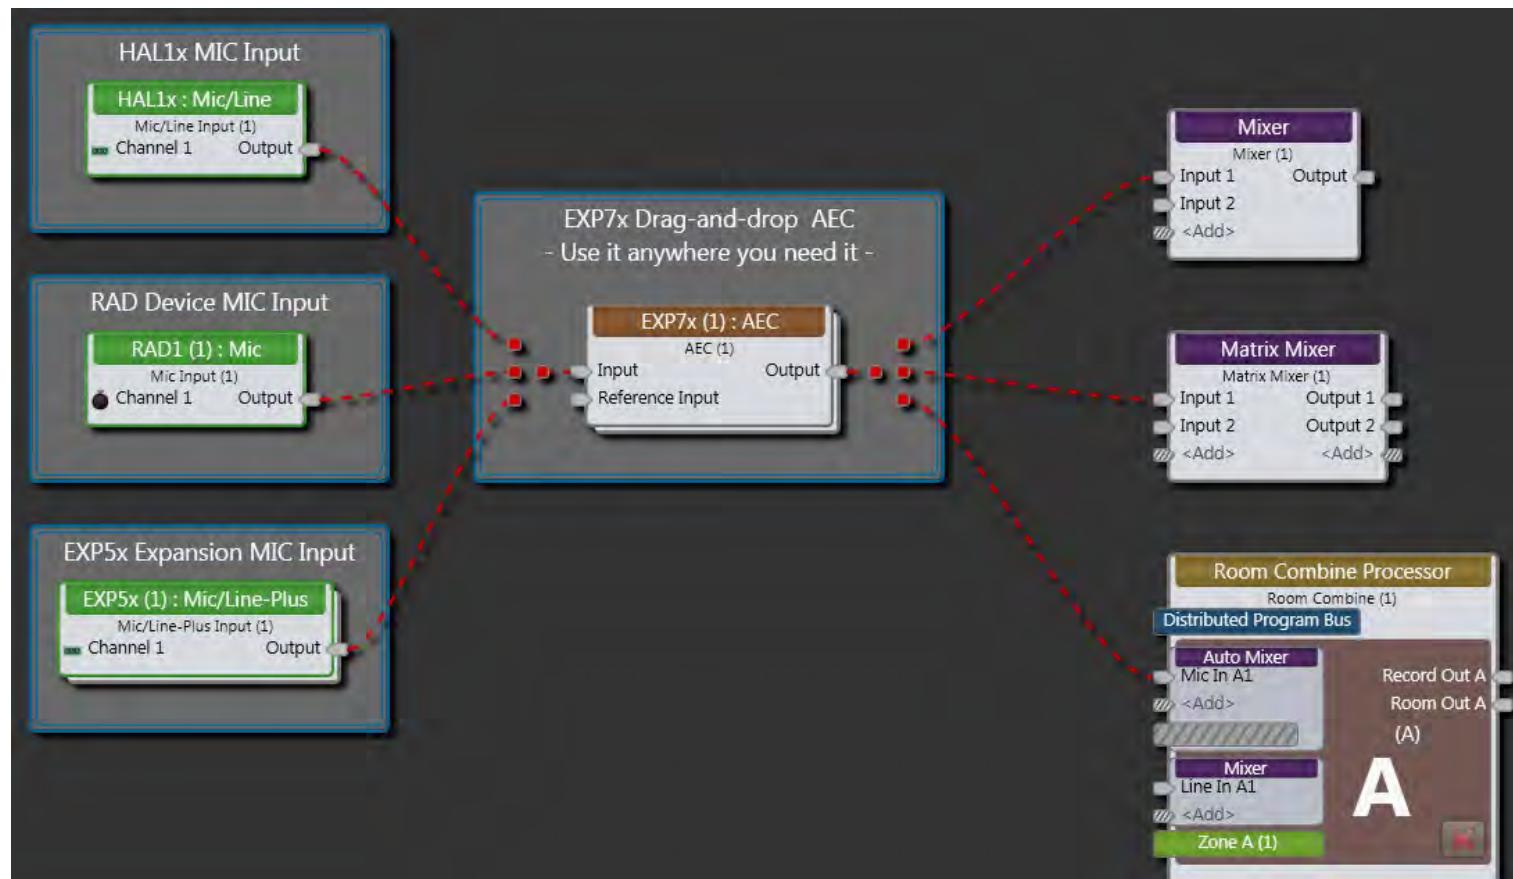

- 8 channels of drag and drop AEC
 - Use the AEC block with any HAL1x input anywhere in the system
 - e.g., Analog, RAD, EXP, AES3, USB Audio, **Dante**

Drag and Drop AEC

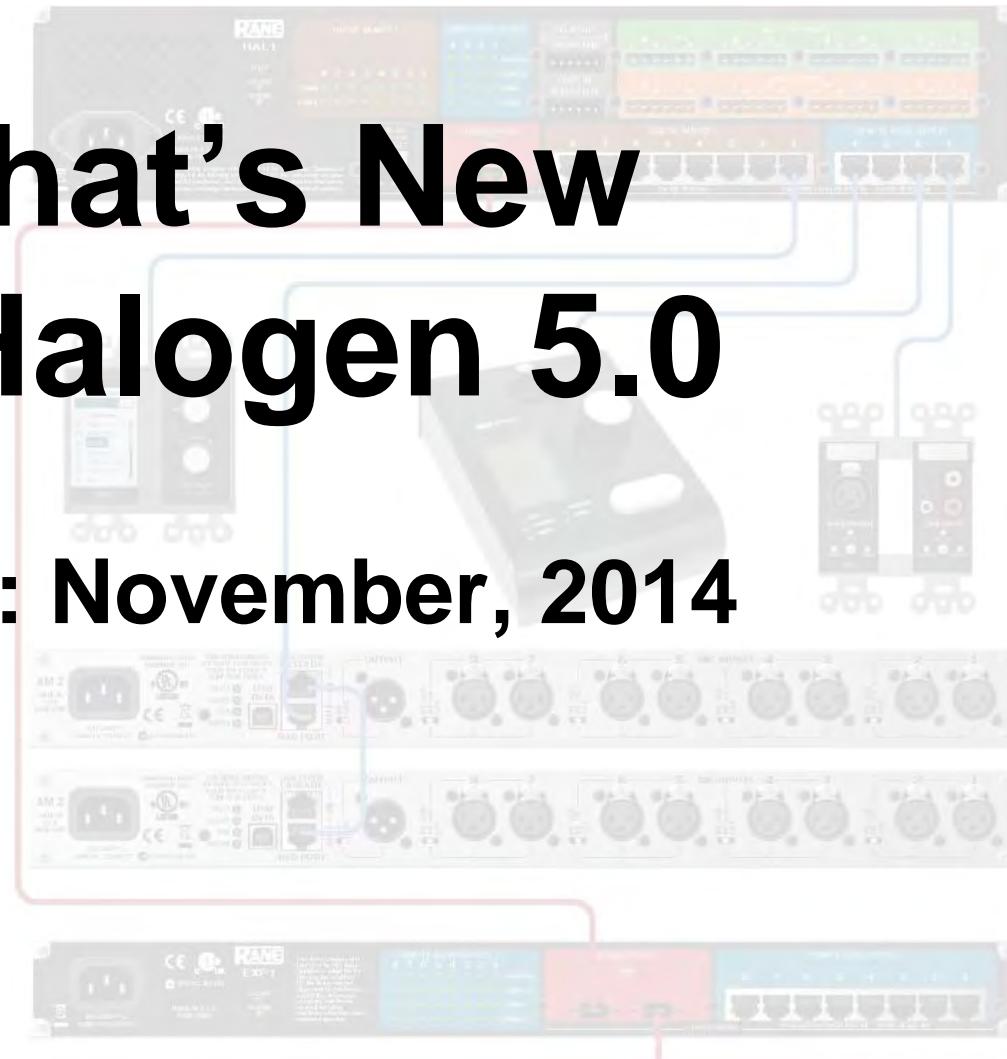

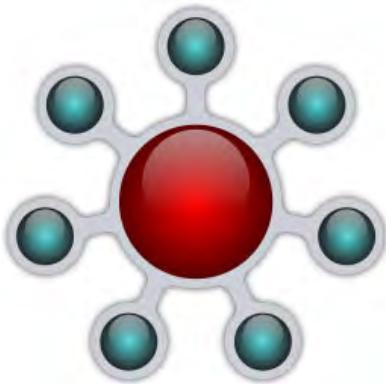

Drag and Drop AEC

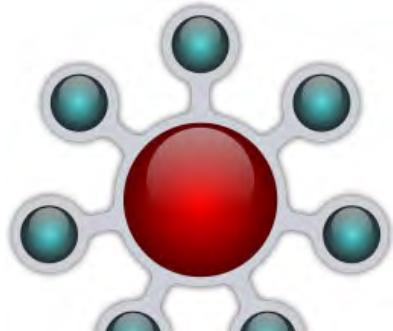

What's New in Halogen 5.0

Ships: November, 2014

New HAL System Products

- Coming for November, 2014 in Halogen 5.0
 - 1. FIR filter import DSP block
 - 2. DR6 Remote: 7" customizable touch screen
 - 3. EXP2x: Dante 32 x 32 Expander for HAL1x

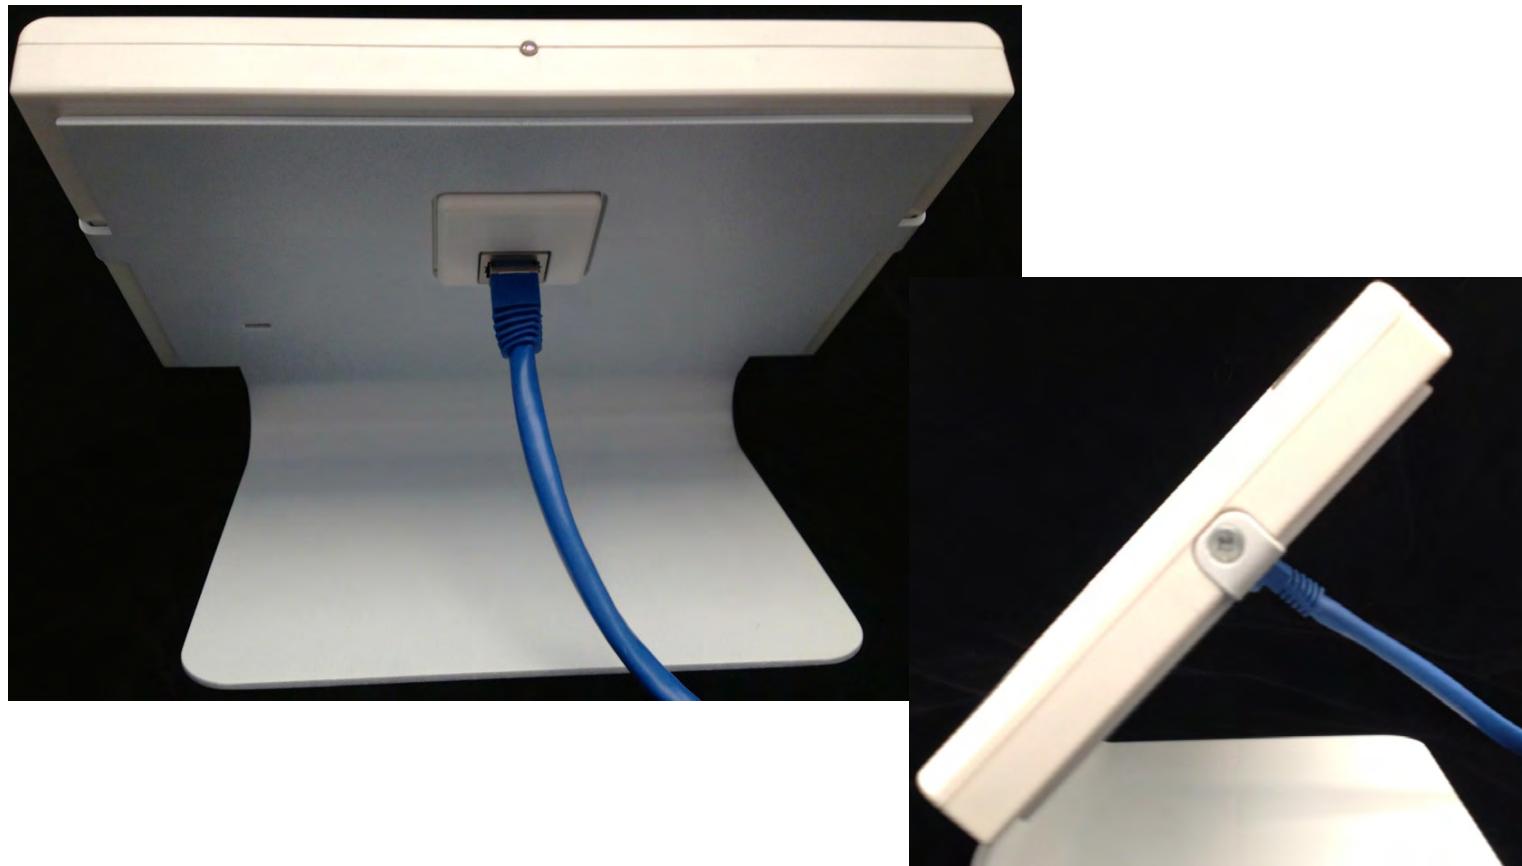

Rane DR6 Remote

- 7" color LCD touch screen
 - Custom screen program a la Web Controls
 - Wall mount bracket & accessory desktop stand are white

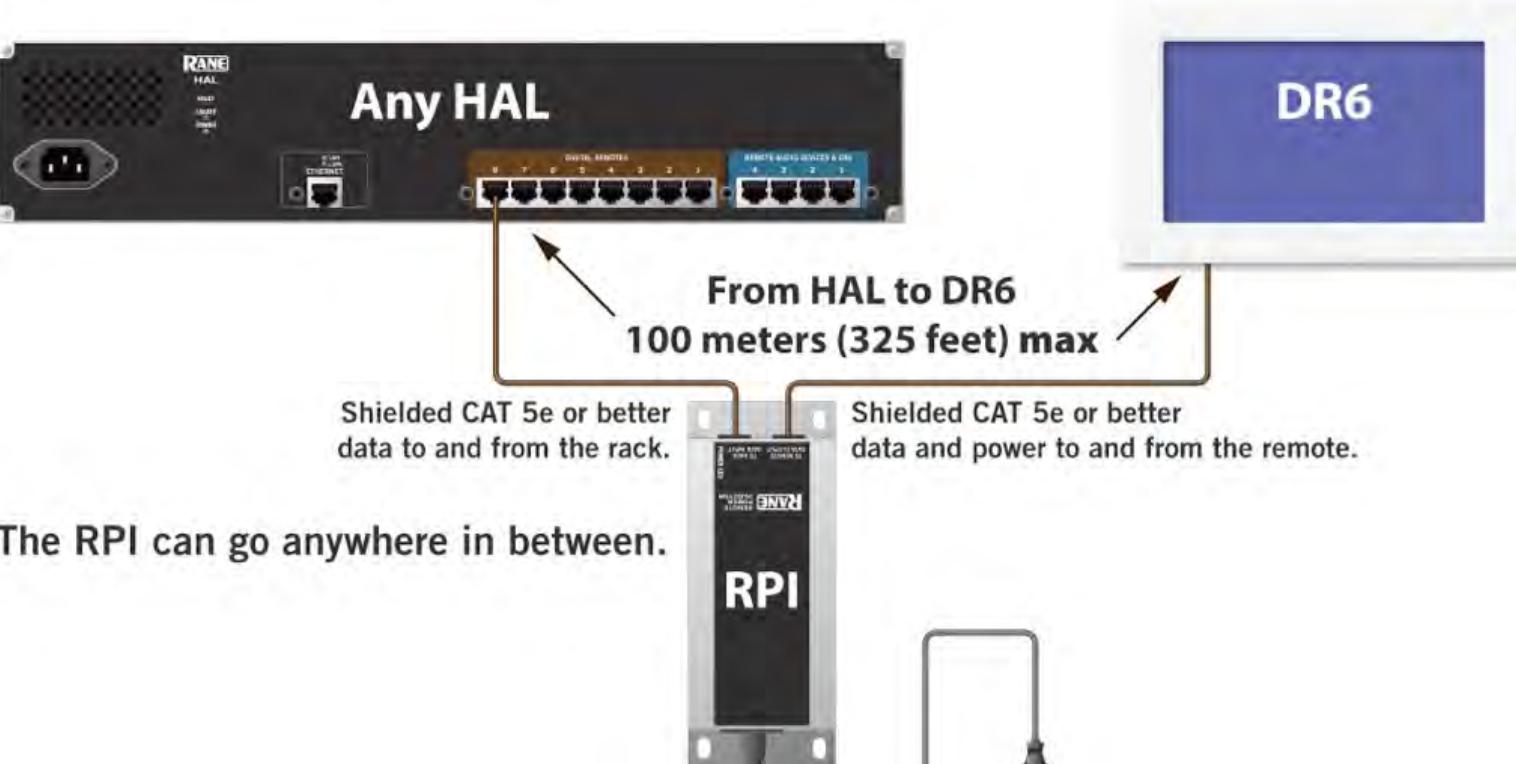

Rane DR6 Remote

- Accessory tabletop stand sold separately

Rane DR6 Remote

- Includes RPI: Remote Power Injector
 - Place RPI between any HAL RAD/DR Port & the DR6

HAL System Architecture

Halogen Windows on PC, Linux on HAL devices

Brains:

HALs

Control:

DRs
Knobs & Buttons

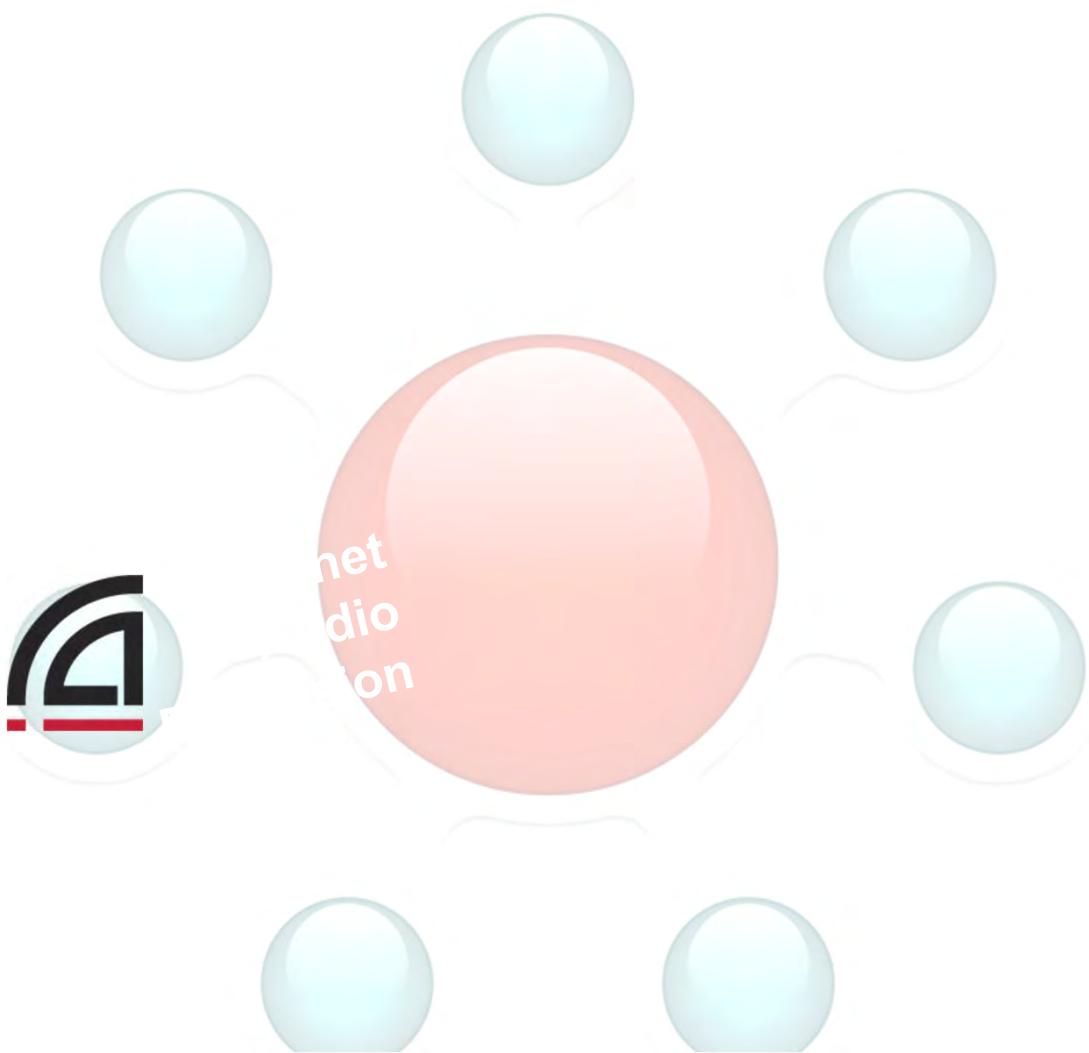

Web Controls

TCP/IP Control

Audio Expansion:

RADs
2x2 A/D+D/A
at the wall

EXPs
Proprietary & Standard
Audio-over-Ethernet

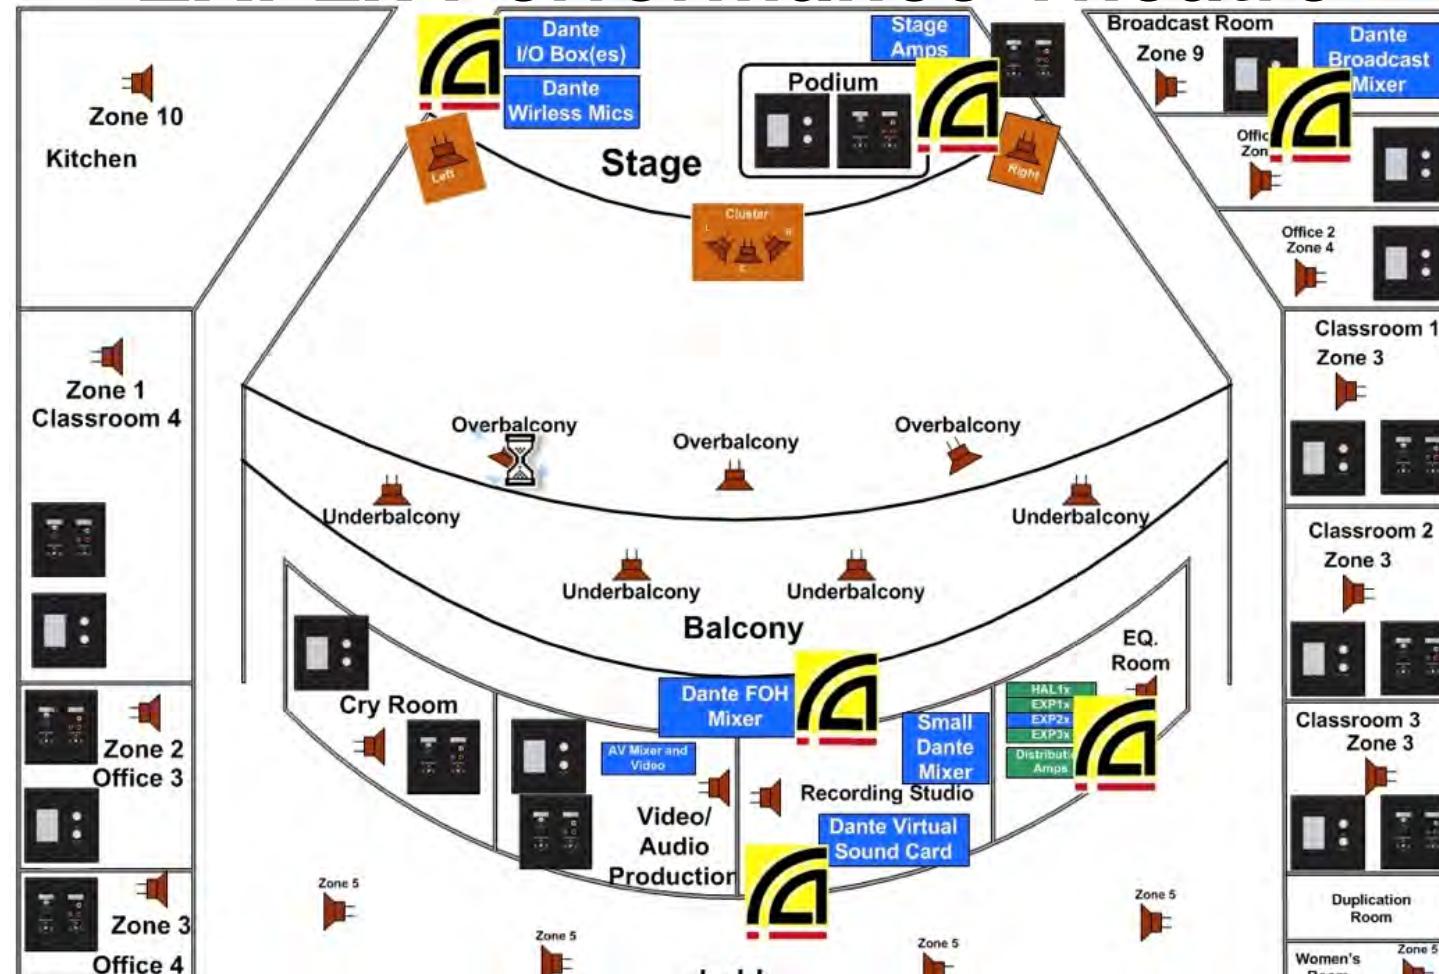

New EXP2x Dante Expander

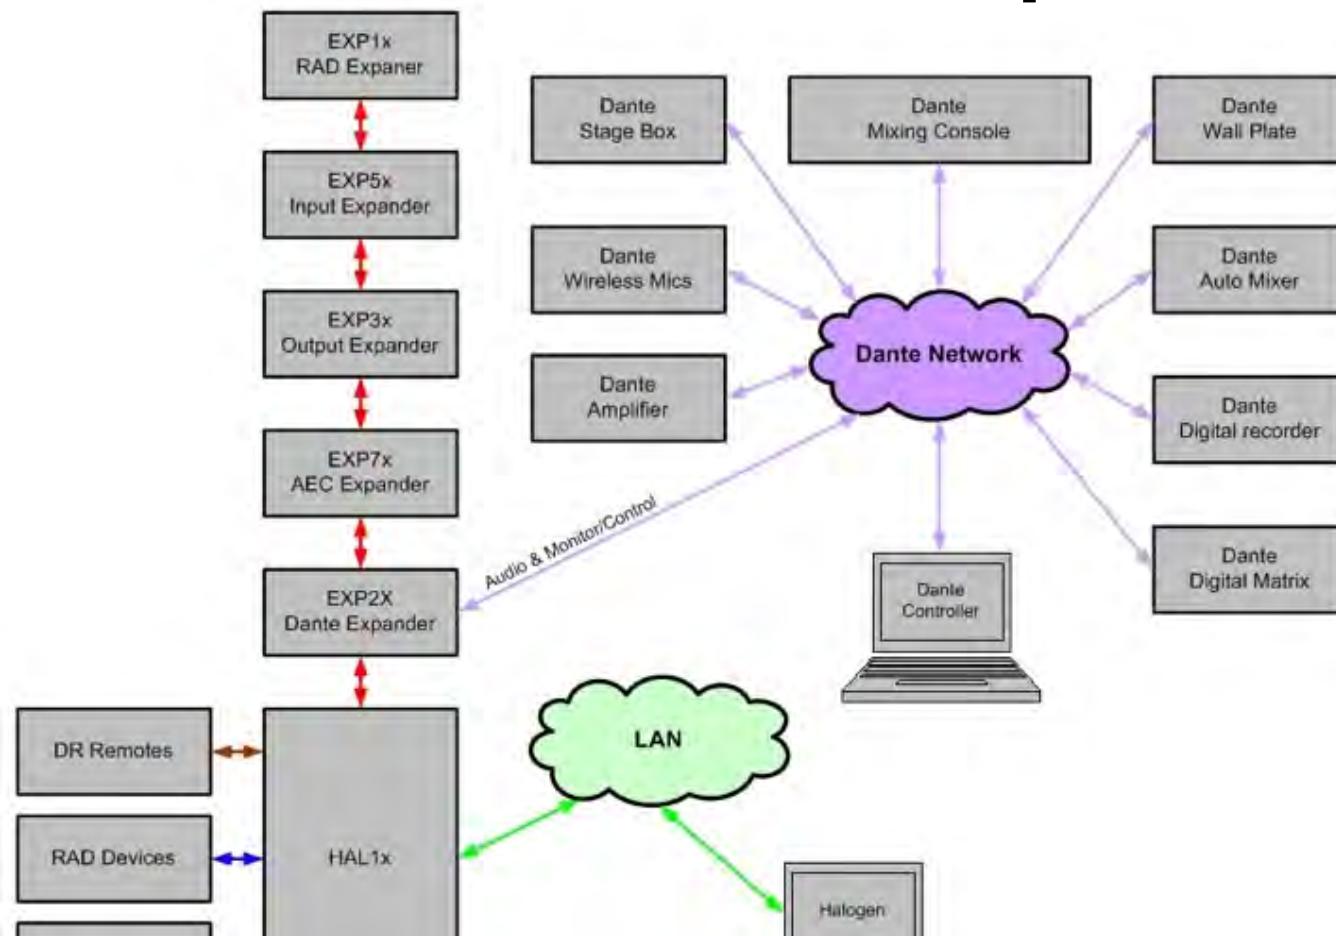

- Network facilities or multiple independent HAL1x Systems together
- 32 x 32 Dante channels @ 48 kHz or 96 kHz
- Daisychain up to 16 EXP2x to a single HAL1x: 512 x 512 channels, maximum
- Secondary Dante port supports Redundant or Switch modes

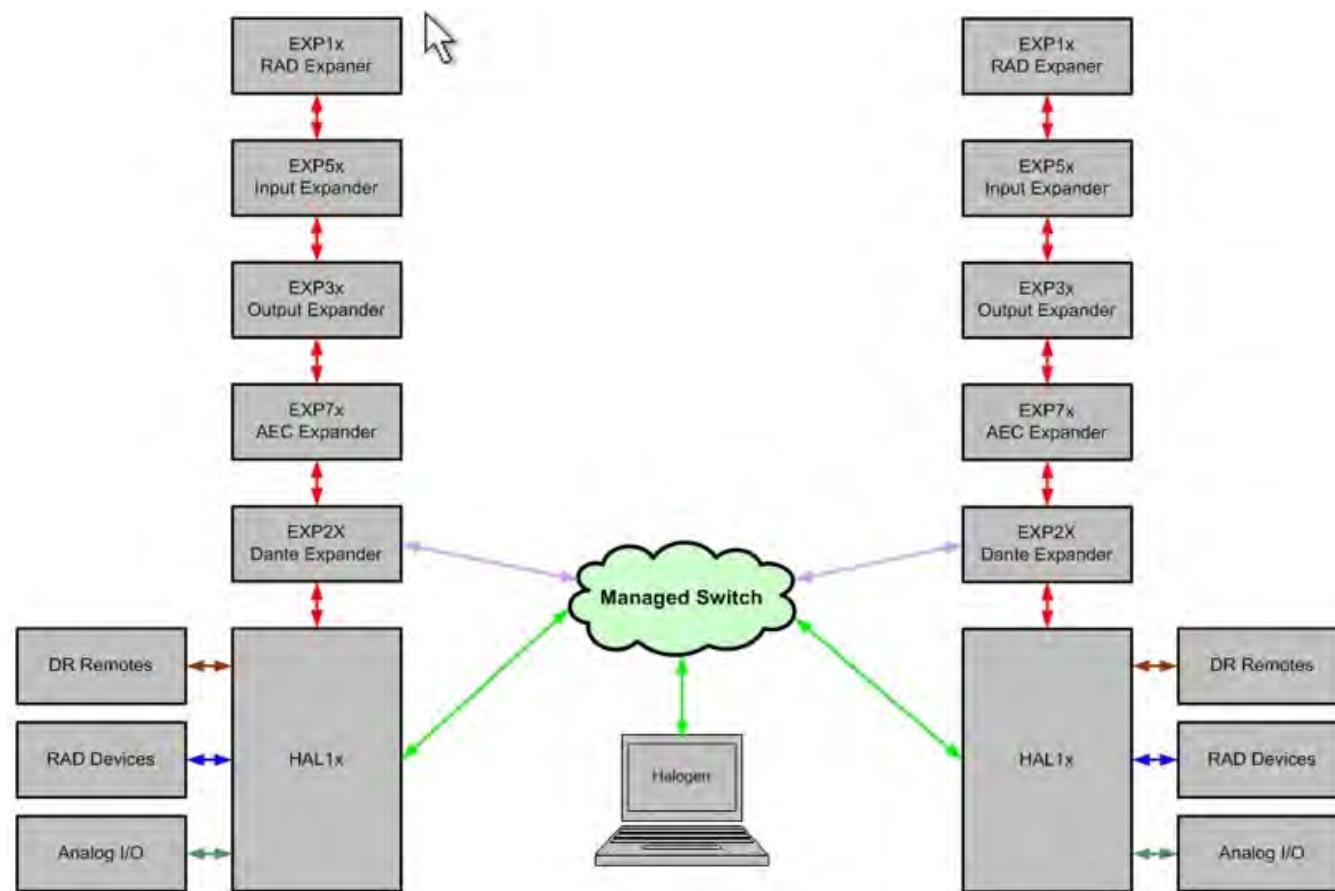

EXP2x Performance Theatre

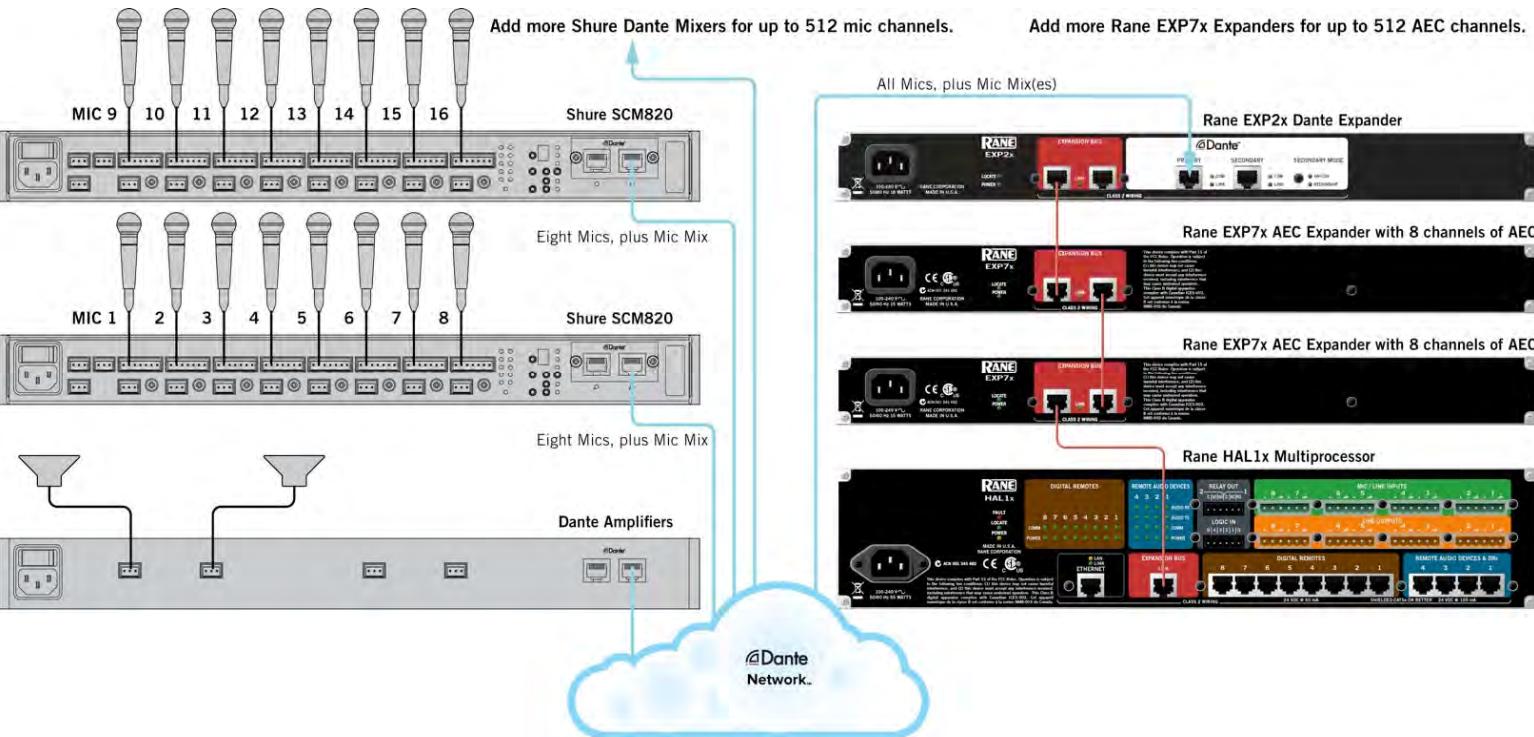

New EXP2x Dante Expander

New EXP2x Dante Expander

Add AEC to Shure's SCM820 Dante mixer(s)

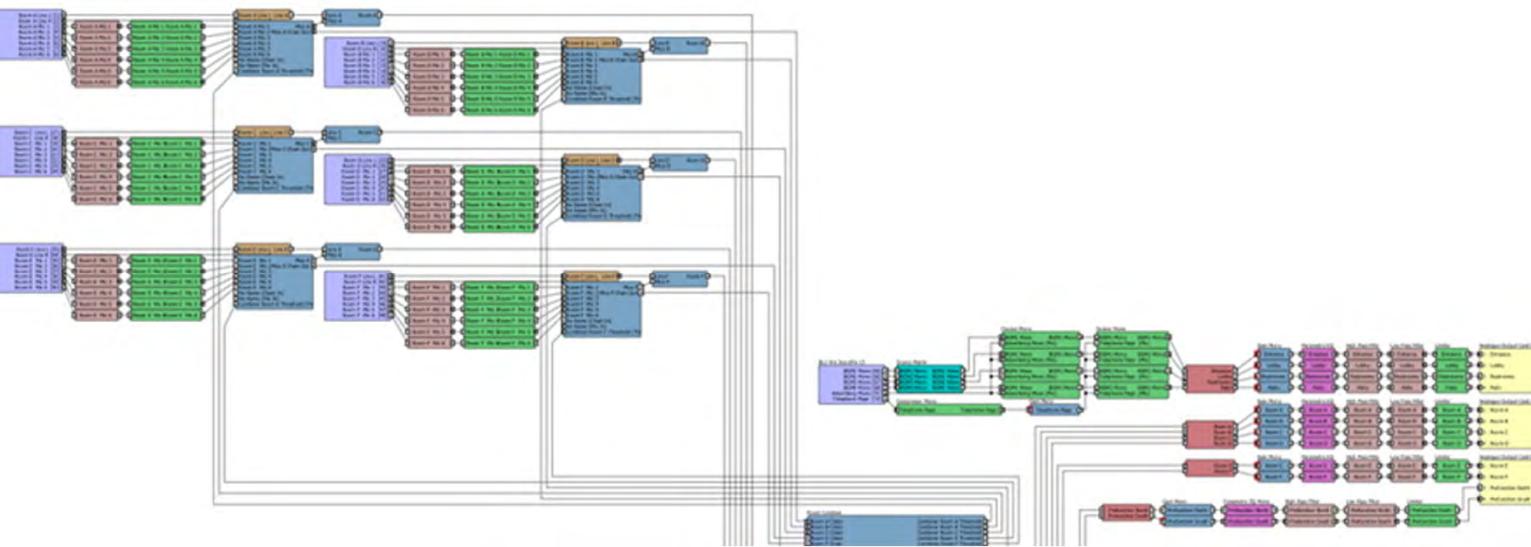

Halogen Highlights

- **Paging Manager**
- **Web Controls - drag & drop**
- **Hardware Workspace**
- **Zone Processor & Distributed Program Bus**
- **Linking to DRs, 3rd-party & web pages**
- **Room Combine blocks**

6 Room Combine Comparison

- BSS: 183 blocks, 271 wires.
- No paging into room combine rooms

6 Room Combine Comparison

- Rane Halogen:
171 blocks, 162
wires
- Adds paging into
any room with no
“logic”
programming

Consultant Benefits

- **Get on the Plane Indicator**

Hardware

Processing

Host Status: HAL is functioning and configured correctly. No problems or errors detected with connected devices.

Green means "Get on the Plane"

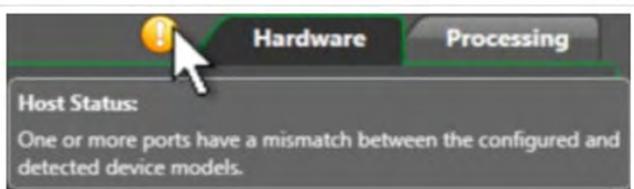

Know HAL #1: HAL's "Get on the Plane" Indicator

Does your formerly favorite audio DSP tell you all 7 of the following things with a single, live device software indicator?

All hardware devices in your original Halogen design file are:

- (1) physically present in the building and connected,
- (2) in the proper location in the building,
- (3) all cables were pulled through the building without mistakes or mislabeled cables,
- (4) all cable crimps on all RJ-45 cables are correct,
- (5) control communications and all audio I/O are already working,
- (6) the settings for all DR and RADs are intact and working,

Hardware

Processing

Host Status: One or more ports have a mismatch between the configured and detected device models.

Contractor / Installer Benefits

- **Labor savings: HAL System shows you install errors & offers real troubleshooting help**
 - With & without software; on- or off-site
 - In software: “Get on the Plane” Indication
 - In hardware: Indicators at both ends of cables
- **Highly integrated DSP blocks**
 - Application-level blocks, not building blocks
- **Intuitive Linking that's verifiable**
- **Ease of programming custom Web Controls**
- **Installers can run any and all versions of the Halogen software on the same laptop**

Client / End User benefits

- **Ease of use for DRs & Web Controls**
 - DRs - custom labeling, location-aware/portable
 - Web Controls - use the phone in their pocket...
 - No “app” or OS updates to get in the way
 - Often used solely as a monitor for admin/managers
- **Ease of PC audio integration - USB Audio**
 - AM1 & RAD27 audio sound cards - no drivers
- **Rane architecture: HAL stores everything**
 - Easy replacement/inventory, backup, swap...
 - System indicators for unsophisticated debug
 - Most DSPs lack such a simple feature

Final Unique Points

- Do large complex jobs fast with fewer wires, presets and intuitive control linking
- Converters at the wall (RADs)
- Paging system eases pager-to-zone map
- Verify control linking behaviors offline
- Auto-verify CAT5 & audio signal integrity
- Auto firmware: plug it in, it works
- Gain-share mix between wall mic jacks, portable mics and rack-connected mics

Thank you

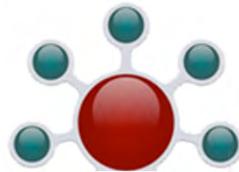

Since 1981, engineered, designed, built, tested & supported
in Mukilteo, Washington, USA
